

## Community Resource Guide

---

Over the last several decades Americans have become more overweight, and this trend has been reflected in our children. The percentage of children who are overweight or obese in Utah is estimated to be 25.5% for children in grades K-8 and the rate has been increasing in adolescents (<http://health.utah.gov/obesity/docs/ObesityReportCh1.pdf>). The purpose of this booklet is to provide some general ideas to help you increase the health of your child and decrease their risk for becoming overweight. The ideas below can be found at <http://www.medhomeportal.org>. Incorporating changes such as these can significantly reduce many environmental factors that can increase your child's risk of becoming overweight.

### Some Ideas for Parents and Children

#### Meals

- Start healthy habits early. Model healthy habits.
- Eat meals together (teaches and models smart eating habits).
- Eat at a table with TV off, and make it a pleasant time.
- Establish a structure for meal and snack times and only allow eating at those times.
- Limit eating to only certain areas of the home.
- Open and close kitchen. Open for meals only (green sign at the door) closed at other times (red sign at the door).
- Let kids help themselves to food. Adults tend to dish out bigger serving sizes and expect kids to clean their plates. Kids need to develop their own cues for hunger and feeling full. Disband the "Clean Plate club."
- When serving meals cover half the plate with fruits and vegetables, and contents of lunch sacks should be half fruits and vegetables.
- Involve the kids in planning meals and preparing them (e.g. school lunches).
- Don't overly restrict sweets.
- Offer water when thirsty, milk at meals, soda and juice as treats only.
- Increase access to fruits and veggies by preparing ahead of time.
- Make bottom shelf of refrigerator into anytime anywhere foods. Already prepared veggies and fruits.
- Set aside an accessible area of the kitchen for healthy snacks that are in pre-portion sizes so family members can help themselves.
- Place treats and special occasion foods in a hard to reach location.
- Introduce reasonable solid foods not french fries and soda.
- All family members participate in the "Five a Day Challenge," winner chooses the family activity for the week.
- Reward children with praise and time together not food.
- Watch portion sizes.

#### Activities

- Individualize activity to your child. Some kids enjoy team sports and some enjoy solitary activity.
- Be more active. Take 10 minutes to play Frisbee, walk to the park and/or shoot hoops.
- Limit TV and video time. Consider adding a dance video game to your system without restriction of time played.
- Buy birthday and holiday presents that promote movement, such as roller skates, Frisbees, etc.
- Find activities in your community, such as hiking trails, swimming pools, and skating rinks.
- Set family goals (walk three times a week), write them down, and track progress.
- Plan special weekend activities, such as flying kites, playing tennis.
- Have each family member wear a pedometer and strive for 10,000 steps per day.
- Plan parties and vacations around movement and play; hold a swimming party instead of a movie party.
- Start family home evening with a physical activity.
- Start a "Walking School bus" (<http://www.walkingbus.com/>).

## Community Resource Guide

### Boys and Girls Club

Boys & Girls Club offers several programs that focus on increasing physical activity, improving nutrition, and developing good habits. Programs run after school and during the summer. Please contact individual clubs for exact hours of operation.

The Triple Play program is a dynamic wellness program currently offered in Boys & Girls Clubs that demonstrates how eating right, keeping fit and forming positive relationships add up to a healthy lifestyle. The goal of the Triple Play program is to improve Club members' knowledge of healthy habits; increase the number of hours per day they participate in physical activities; and strengthen their ability to interact positively with others and engage in positive relationships.

## Community Resource Guide

### LiVe

<http://intermountainlive.org/>

Intermountain Healthcare offers classes and nutrition counseling for healthier living and weight management. Courses are available for children, teens, and adults.

#### Group Course

You and your family attend nine group classes with 15 to 20 other people, including kids and their families. A registered dietitian trained in weight management leads the class, which includes presentations, games, and cooking demos. You will participate in different physical activities during some classes.

All Ages .....\$225 per family  
(\$200 reimbursed upon completion with select health insurance)

#### Individual Counseling

You and your family attend nine one-on-one sessions with a registered dietitian. A registered dietitian trained in weight management evaluates your diet, physical activity, eating environment, and nutrition status. You schedule appointments at your pace. To complete the program, schedule nine sessions in a 12-month period. Topics are personalized to your needs and lifestyle.

All Ages .....\$425 per family  
(\$200 reimbursed upon completion with select health insurance)

#### Locations:

##### X. McKay-Dee Hospital Center

4401 Harrison Blvd.  
Ogden, UT 84403  
(801) 387-7520

##### Y. Primary Children's Medical Center

100 North Medical Dr.  
Salt Lake City, UT 84113  
(801)662-5316
