Psychomotor Development in Brachmann-de Lange Syndrome

SKILLS ATTAINED (N) | MONTHS | YEARS
--- | --- | ---
Rolls over (71) | | |
Sits alone (73) | | |
Crawls (23) | | |
Pulls to stand (57) | | |
Cruises (49) | | |
Walks alone (54) | | |
Runs (29) | | |
Reaches (55) | | |
Grasps (48) | | |
Transfers (14) | | |
Smiles (67) | | |
Laughs (55) | | |
Feeds self: bottle (34) | | |
| fingers (43) | | |
| cup (47) | | |
| spoon (44) | | |
Clothes: takes off (30) | | |
| puts on (14) | | |
Toilet trained (22) | | |
Babbles (18) | | |
First word (44) | | |
Understands commands (37) | | |
Communicates other ways (36) | | |
Puts words together (22) | | |

Fig. 1. Developmental chart for individuals with BDLS comparing ages of completion of milestones. Number of individuals on whom each range is based is shown after each skill. (See text for explanation.)
